

DON'T TAKE A CHANCE WITH YOUR SENSITIVE DATA

ARCHIVE DATA SOLUTIONS OFFERS MULTIPLE SECURE OPTIONS FOR TRANSPORTING SENSITIVE DATA.

OPTION 1

A two-driver team using a dedicated truck with bonded and insured Archive Data Solutions employees/drivers are transported non-stop, door-to-door service with no cross docking. Trucks are locked, banded, and GPS enabled. Banded serial number will be provided to customer at pickup and a photograph of the unbroken band will be emailed to the customer upon arrival at our secure facility. Drivers check in with the customer at predetermined intervals during transport. Cargo is under constant surveillance by Archive Data Solutions employees. No contract or outsourced labor is involved. Minimum quantities may apply. Additional service: ex-military escort.

OPTION 2

Similar to option 1, however the transportation is secured for us. Cargo items are transported non-stop, point-to-point with no cross docking. Trucks are locked, or banded. Additional monitoring service is available whereby Archive Data Solutions employees follow the transport truck with GPS enabled equipment and monitor the truck during all stops when unattended. Minimum quantities apply.

OPTION 3

Secure locking tote transportation for less than truck load shipments. A secure locking plastic tape tote that will accommodate 200 tapes or drives is shipped to the customer. The tote includes four 50 pack shipping boxes, removal straps, packing material, two locks, and two tie bands and shipping information. Tub dimensions are 14 ½ 28" (L) x 20 ½ (W) x 14 ½ (H) and weigh approximately 125 lbs each when fully loaded. No minimum required.
