

LOOKING TO CUT STORAGE COSTS AND MEET CAPACITY DEMANDS?

INCREASING DATA DEMANDS, FEWER RESOURCES, A REDUCED BUDGET... BIG HEADACHES!

Are you caught in the trap of managing ever-increasing data capacity demands but with fewer resources AND with a tighter budget?

We know what you're going through... Regain control with our Media Lifecycle Management Services.

Every IT organization is under added pressure to do more with less in their data center. Archive Data Solutions can help you accomplish this challenge with our media lifecycle management, media buyback, or redeployment services.

MEDIA LIFECYCLE MANAGEMENT SERVICES

POINT OF PURCHASE

Let us help you stretch your IT budget on your purchase of new equipment & supplies.

REDEPLOYMENT

Put your eradicated, write-ready tapes, drives, and assets back into use in your storage environment with our redeployment services. If needed we will label and initialize each tape and (at no additional charge) hold them until they are ready to be deployed to your data center location.

DATA MIGRATION AND FORMAT CONVERSION

Trust our secure solutions to handle special project requirements for technology migration, litigation holds, or duplication requirements and eliminate disruptions to your data center.

SECURE DATA AND MEDIA DESTRUCTION

Don't even THINK of getting rid of those old drives or tapes without first eradicating the data on them! Our secure destruction services are environmentally sound and comply with D.o.D. standards.

MEDIA BUYBACK / ASSET RECOVERY / E-WASTE

Stretch your storage budget by converting end-of-life assets into Technology Credits with our tape buyback, asset recovery, or e-waste programs. This credit is redeemable towards any future order of storage products or data center services from Archive Data Solutions.
